----We can tell you a thing or two you've been doing, or thinking about when we were not present, --- Now, you wonder what's coming.

If we were to but-in-to you any morning just after you had eaten breakfast, and look you straight in the face and discover a small portion of egg adhering to your chin or one corner of your mouth, we could tell you that you had eaten eggs for breakfast, --- that's easy, --- you could do the same thing on a reversal.

If you do not own an automobile, we can tell you that you have been thinking of and debating the queftion in your mind with regard to how soon, or just when you will buy that car.

If this is not true, then we have missed our guess only in about one instance to every one hundred men in the United States today. There are at present over six million automobiles in actual operation in this country, one to every 16 people of its population.

At present, we have on hand the largest array of automobiles ever displayed in this section of the State. Prices ranging from \$825 up to \$3150, in Four, Six and Eight Cylinder, Five and Seven Passenger Cars.
